

Procedure for Installation of Booth Convenience Handles

You will need an adjustable wrench to attach the convenience handles to your booth. The illustration shows the proper locations of the handles. One door is not shown for illustration purposes only.

Use a 3/8" x 3/4" hex-head bolt to attach the top of each handle, as shown at right. Use a 5/16" x 3/4" hex-head bolt to secure the bottom of each handle.
